

TAILGATE CANOPY

Held in place by the weight of the vehicle - no stakes or weights needed

HERE'S HOW IT WORKS

- Works on Pickups, including those with toppers, SUV's and Vans
- Use for outdoor vending stands, tail gate parties, job site applications and more
- Easily set up in minutes by 1 person while standing on the ground
- Tips into place and locks securely into receiver hitch
- Compact design breaks down and stores in minimal space
- Vehicle can be moved while canopy is attached

1 person assembly from the ground in minutes

Breaks down into a small package.

Assembles easily while standing on the ground and then tips and locks into place. The canopy is anchored by the weight of the vehicle at the receiver hitch. The frame is manufactured of galvanized 1 3/8" tubing and the fabric top of durable rip stop polyethylene or vinyl complete with grommets and ball bungee tie-downs.
